babyMIND software meeting

Minutes taker Sven-Patrik Hallsjö

Those present Ryan Bayes, Etam Messomo, Saba Parsa.

Location of the meeting Skype

Date March 4, 2016

Overview of topics

1   Discuss the current status of the software, continuing the discussion from the general meeting on Wednesday

Sven-Patrik Hallsjö informed that decay in orbit explains the difference which is not explained by mu- capture. It would be interesting to compare simulation with real data.

Is there a difference between different physics libraries? Would it be possible to compare with fluka simulations?

Task: Check mu- capture cross-sections in literature and compare with geant. (Sven-Patrik Hallsjö)

2   Progress of framework for multiple developers

Sven-Patrik Hallsjö informed that Glasgow University is working on creating a framework preliminarily using Jenkins and redmine to simplify development using multiple developers.

3   Next meeting

Friday the 11/3-16 at 10 am GMT via Skype.
